

How can Virtual College help you?

**Creating learning that
drives change**

At Virtual College we live and breathe digital learning. From our ready-to-go digital training catalogue through to large-scale customised training programmes, all of our high-quality learning experiences are underpinned by first class learning technology.

A part of Netex learning, we have an experienced team of over 250 employees globally and lean on more than three decades of expertise to build training programmes that help you meet your learning objectives.

Ready-To-Go Digital Training Catalogue

Our vast catalogue of over 250 certified and accredited digital courses is designed to meet common workplace learning needs. Covering everything from health & safety and compliance through to soft skills training, our courses are designed to scale, perfect for organisations of any size and delivered through our simple, intuitive and cloud-based LMS.

Whether you are looking for one course or 100, have a team of 5 or 500, our two offerings – Pay as You Go or Build Your Own Training Package – have you covered.

Build Your Own Package – Digital Training Catalogue

If you're looking to deliver essential workplace training to hundreds of learners, our Build Your Own Training Package is what you need. With a catalogue of over 200 digital courses, we'll work with you to tailor a training package to your organisation and learners.

- Large training package
- 200+ licences
- Tailored advice from our learning consultants
- Delivered through our simple, intuitive and cloud-based LMS
- Report, manage and add your own learning content
- 12-month annual subscription
- Choose from over 200+ accredited and certified courses
- Choose the number of licences appropriate to you
- Onboarding support, if and when required
- Easily use your own LMS if you already have one in place.

Pay As You Go – Digital Training Catalogue

If you're training small teams or individuals, our Pay As You Go offering is for you. Ideal for those who need to buy training as and when they need it. You just log in and away you go!

- Ideal for small teams and individuals
- Hassle-free training which can be accessed anytime, anywhere
- Search and purchase through our online shop
- Choose from over 250+ accredited and certified courses
- Easy access to courses through our simple and intuitive LMS
- Instant access to digital certificates

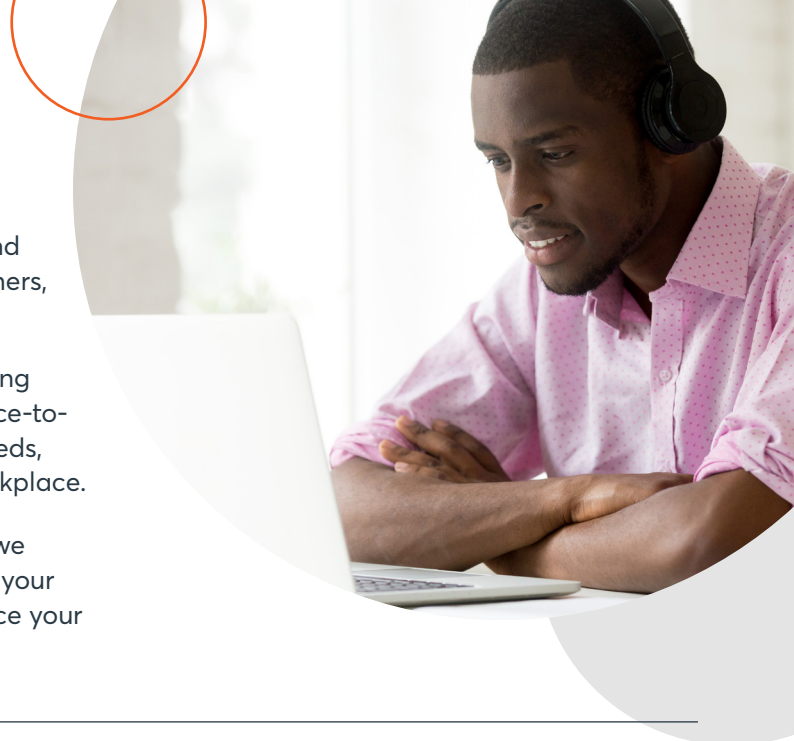

Bespoke Training

Simply put, we build high-quality, modern and innovative learning experiences. Customised to your organisation and designed around three essential components – your learners, your objectives and your brand.

We regularly help with common and more complex training problems such as resolving a training backlog, scaling face-to-face training digitally or responding to changing skills needs, through to keeping people safe and compliant in the workplace.

Using our Human-Centred approach to learning design, we build customised training that makes a real difference to your organisation, building the skills, knowledge and confidence your people need to excel.

Learning Technology

Our LMS, Enable, is simple and intuitive, cloud-based and mobile responsive – everything it needs to be to help your organisation manage and deliver online learning in an engaging and cost-effective way.

Branded to reflect your organisation, you'll have all the tools you need to consolidate learning activity in one central place, communicate and engage with your learners and deliver effective learning content in a variety of digital formats.

- Easy set up and onboarding
- Learner nudges & reminders
- Keep track of staff compliance
- Report & measure performance
- Dedicated customer and learner support team
- Access from any device anytime, anywhere

Our Approach

Our approach to learning design is second to none. Never a company to stand still, our learning design has evolved over three decades and has been tried and tested on hundreds of thousands of diverse customers and clients. In fact, we've delivered training to over 5 million learners.

After working with organisations big and small from a wide range of sectors, you could say we've learnt a thing or two about what truly works.
